

Laser Transfer Paper for White and Light Colored Fabrics (Tech-Print)

Instructions

Tech-Print Laser Transfer Papers are designed for both oil and oil-less laser printers and copiers. They are for the heat transfer of photos and images to T-shirts, sweatshirts, mouse pads, coasters, puzzles, handbags, binders, pad folios, paper, leather, magnets, wood veneer, nylon and more. Choose garments that have a tight weave. This is particularly important when transferring to sweatshirts.

Choose a white or light colored substrate. Cotton/poly blend shirts will give you the best wash ability. You can also apply to 100% polyester such as mouse pads. When applying to 100% cotton shirts the image will transfer fine. However, cotton tends to fray in the wash and therefore is not recommended for a digital transfer process.

PREPARE TO PRINT

For printing onto textiles (ie: Shirts, mouse pads, etc) Set your resolution to 200-250 DPI maximum. Printing at higher resolutions than this is a waste. Fabric can only hold approximately 200-250 DPI of resolution! You will still get good photo quality results.

TEMPERATURE 193° C/ 380° F
PRESSURE High
TIME 25-30 Sec.

PRINTING

1. Mirror the image.
2. Load the paper so that the image will appear on the coated side of the paper.
3. TECHNI-PRINT® 4.0 Paper should be fed into the copier or printer with the short dimension first (grain long).
4. Start with "Plain Paper" mode. If toner does not fuse completely, adjust to a heavier paper setting.
5. Trim away the unprinted areas of the transfer for softer hand (feel) if desired.

TRANSFERRING

Using a Commercial Heat Press (only)

1. Place the transfer sheet face down on the substrate and press: **30 seconds at 375°F using heavy pressure.** Press **must** snap closed **firmly**.
2. Peel while **still hot!** Peel Transfer **IMMEDIATELY**

TRANSFERRING- USING A COMMERCIAL HEAT PRESS

WASHING INSTRUCTIONS

Turn garment inside out and wash in cold water using a mild detergent. Do not use bleach. Dry on low heat setting. Do not iron directly on the transferred area.

STORAGE AND HANDLING OF TECHNI-PRINT® 4.0 HEAT TRANSFER PAPERS

Store TECHNI-PRINT® 4.0 Papers in a cool, dry area and do not remove from carton or poly bag until you are ready to use.
